SR 392

Surface mounted door coordinator

The DORMA SR 392 is a coordinator for double-leaf fire and smoke check doors. It is non-handed and suitable for unequal door leaves.

Size 1, length 1050mm (door leaf width greater than 800 mm)

Size 2, length 650 mm (door leaf width less than 800 mm)

Minimum double door width -1225mm. Minimum width of inactive leaf - 350mm

MK 396

Carry bar

The MK 396 carry bar is used in conjunction with door coordinators.

Its function is to extend the opening angle of the active leaf ensuring that the coordinator engages every time.

RMZ

Stand alone smoke detector

The RMZ smoke detector in the Contur design supplies connected hold-open devices with 24 V DC voltage. In the event of smoke detection or an alarm, it trips the devices, thus releasing the door to close under spring power. Connections for further smoke detectors, as well as for external manual release and a floating change-over contact are also available.

RMN

Smoke detectors

The RM-N smoke detectors are used in conjunction with integrated EMR smoke detectors as well as the RMZ stand alone smoke detector. These units are used to ensure early detection and are necessary where high ceilings are present.

Refer to DORMA TS 93 technical brochure for further details.
