

dormakaba PHA 2501 /PHA 2501 VB

Panic hardware systems

Advantages at a glance

For trade

- Systems certified to EN 1125
- Numerous lock-fitting combinations available
- Standardised pushbar adaptable to individual door widths

For fitters

- Can be combined with imetested SVP and M-SVP locks
- Components can be ordered for a convenient point in time

For planners

- Certified, standard-compliant system
- Can be combined with escape route security, motor locks and swing door operators

Don't panic!
Now order panic hardware elements individually
– right when you need them

dormakaba now offers the option of ordering integral parts of high-grade panic exit devices separately for fire and smoke doors in a single-leaf timber or narrow stile design. The PHA 2501 and PHA 2501 VB systems guarantee maximum security for such doors in compliance with EN 1125.

Reliable and modular

Fitting and pushbar create an aesthetic design which can be easily seen and grasped. The series is specially designed for SVP self-locking emergency-escape locks and M-SVP multipoint locking systems. A high-performancepanic hardware system is thus provided from a single source and suited to your needs.

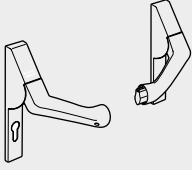

The new way to purchase panic hardware.

From now on, you only order the exact modules that you currently need. Very conveniently at the right time.

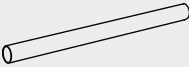

Wide selection
Numerous lock-fitting combinations available.

+

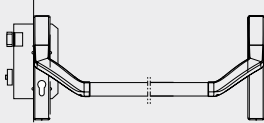

Discreet aesthetic design
High-performance technology with extremely flat design

+

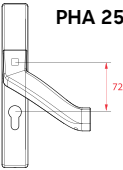

High-grade bar
One pushbar. Adjustable for different door widths.

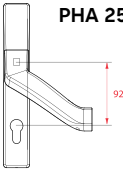

=

Harmonious system
All components are precisely matched to one another.

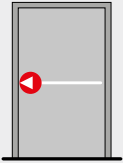

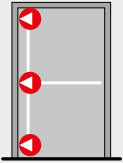

PHA 2501 VB

PHA 2501

Adapts. The fitting is available with centres distances of 72 mm and 92 mm in a stainless-steel or silver-coloured finish.

Install today – extend tomorrow

- The PHA 2501 and PHA 2501 VB series are highly versatile, the perfect basis for secure escape route doors..
- Only four variants necessary for all dormakaba locks with EN 1125 approval
 - Can be combined with OGRO external fittings
 - Extra escape route door security with components, such as the TMS Basic set, is still possible without any restrictions
 - Suitable for multifunctional doors, e.g. those containing a swing door operator, when combined with motor lock
 - Intuitive operation – ideal for equipping escape route doors for people unfamiliar with your building
